

Speed painter - Live Gluing

Category : Speed painting and sand painting

Published by [Magicircus](#) on 2008/3/2

The « speed painting » is now over, here comes the « Live Gluing » !

« Live Gluing » is the process created by Michael Raivard. It consists in creating the portrait of a person of your choice in just a few minutes with only glue and sparkles.

The effect is really impressing as you need to wait till the last minute, once Michael has put the sparkles on the canva, to finally discover who the person is.
