

Bolas de Fuego - Dancer with bolas

Category : Dancers

Published by [Magicircus](#) on 2008/7/17

Bolas were used in Argentina by gauchos as a throwing weapon made of weights on the ends of interconnected cords to capture animals by entangling their legs.

Nowadays, there are used by performers as music instruments to play music by hitting the ground with bolas.

We see them from time to time in circus or varieties/cabarets as it is a visual performance!
